

Full90 HINGE Shinguard Meets the NOCSAE Shinguard Standard.

Many soccer players purposely use the smallest shin guard available. This leaves a disproportionately large area of the leg above the top of the shinguard exposed to the rigors of the game. In an effort to address this situation, NFHS has adopted the NOCSAE shinguard standard. This standard addresses this issue by specifying the length of the shinguard based on the height of the player. The idea being that to protect a longer leg the player needs a longer shinguard.

The Full90 HINGE Shinguard is NOCSAE certified and comes in two sizes. The Small/Medium can be used by players up to 5'8" and the Large can be used by players up to 6'2" tall.

If you have any questions regarding the regulations or how the Full90 HINGE will fit you, please give us a call at 1-877-4FULL90 or email us at customerservice@full90.com
